## SUMMARY

Full Stack Developer skilled in MERN stack, AI integrations, Machine Learning, and scalable web applications. Experienced in building production-ready applications using React, Node.js, Express, MongoDB, Flask/FastAPI, JWT authentication, OCR systems, and cloud deployments.

## PROJECTS

**TruthScan**  | React, Node.js, Express, Flask, Scikit-learn, Tailwind CSS Jan 2026 – Feb 2026

- Built an AI-powered fake news detection platform using React, Express, and Flask ML microservices.
- Trained and deployed a TF-IDF + Logistic Regression model on 44,000+ news articles with 94.2% accuracy.
- Implemented dual-mode detection using ML classification and sensationalism scoring for headlines.
- Added confidence analysis, signal breakdown, and deployed the application on cloud platforms.

**MindVault**  | MERN, FastAPI, Gemini AI, OCR, Cloudinary, JWT June 2025 – July 2025

- Developed an AI-powered study platform that generates quizzes from text and handwritten notes using Gemini AI.
- Integrated OCR pipelines using FastAPI, Tesseract OCR, EasyOCR, and OpenCV for text extraction.
- Built secure MERN architecture with JWT authentication, protected APIs, and user-specific study data.
- Implemented quiz analytics, timers, Cloudinary media storage, and deployed services on Vercel and Render.

**Study Planner with AI**  | MERN, MongoDB, JWT, Gemini API, Tailwind CSS Mar 2025 – Apr 2025

- Built an AI-integrated study planner with task management, calendar scheduling, and timer-based progress tracking.
- Integrated Gemini AI to generate enhanced task descriptions and personalized study recommendations.
- Implemented JWT authentication and MongoDB-based user data isolation for secure task management.
- Added animated progress tracking and deployed the application using Vercel, Render, and MongoDB Atlas.

## EXPERIENCE

**Full Stack Developer Intern | UnifiedMentor** June 2025 – July 2025

- Developed a responsive Weather Web App using React (Vite) and TailwindCSS, improving UI load time by 30%.
- Integrated OpenWeatherMap REST API and optimized request handling to reduce redundant calls by 25%.
- Used Git & GitHub to maintain clean commit history and streamline collaboration.
- Deployed the project on Netlify, ensuring smooth CI/CD updates and fast load performance.

**Java Developer Intern | CodeAlpha** Jan 2024 – Feb 2024

- Built and delivered 3 Java applications using OOP principles and modular design.
- Improved application performance by 40% through logic optimization and efficient data handling.
- Completed all tasks independently following SDLC practices and structured documentation.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, C, HTML, CSS

**Frontend:** React.js, Tailwind CSS, Redux Toolkit, Framer Motion, React Router

**Backend:** Node.js, Express.js, Flask, FastAPI

**Databases:** MongoDB, MongoDB Atlas

**AI/ML:** Scikit-learn, TF-IDF, Logistic Regression, Gemini AI API, OCR, Tesseract, EasyOCR, OpenCV

**Cloud & Tools:** JWT Authentication, REST APIs, Cloudinary, Git, GitHub, Vercel, Render, Netlify, Postman, VS Code

**Core CS Concepts:** DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design (Basic)

## EDUCATION

**B.Tech, Computer Science Engineering**

IPS Academy, Indore

2022 – 2026

CGPA: 8.6

## ACHIEVEMENTS

- 4<sup>th</sup> place – College coding contest for solving time-bound DSA challenges.
- 1<sup>st</sup> prize – Science Exhibition for showcasing an eco-friendly innovation project.
- Infosys Foundation Finishing School for Employability – Python Web Developer (Grade A+).
