I am a professional, versatile, and passionate programmer in my daily life. I am a quick learner and have a self-learning attitude. I enjoy learning and exploring new technologies and am passionate about problem-solving. I love almost all the stacks of software engineering. My current stack includes NestJS, Express, Typescript, React, Nextjs, MongoDB, PostgreSQL, MySql, Docker, AWS, etc.

WORKING EXPERIENCE

Software Engineer I - *Teton Private Ltd.*

January 2022 – Present

As a full-time software engineer at Teton Private Ltd, a sister concern of Ulkasemi Ltd. I am responsible for converting ideas to products using modern technology and collaborating with the dynamic team.

- ❖ Developing and maintaining robust applications solutions using a diverse tech stack including ExpressJS, NestJS, React, Redux, NextJS, MySQL, MongoDB, AWS EC2, AWS S3, AWS SES, OpenAI API, Docker, etc.
- ❖ Working closely with the team to ensure seamless integration of software and meet project objectives.
- ❖ Consistently met and exceeded project deadlines, ensuring that high-quality deliverables were produced to the satisfaction of our clients.
- ❖ Adapted to evolving technologies and best practices, staying at the forefront of the industry to drive innovation.
- ❖ Collaborating with the front-end and QA teams to ensure that the project objectives are integrated seamlessly.
- ❖ Working with the front-end development team as a full-stack developer using React, Redux, NextJS, SCSS, and Tailwind CSS.

Throughout my professional journey at Teton Private Ltd, I have worked in Typescript, Express, NestJS, React, NextJS, Redux, MySQL, MongoDB, Redis, Prisma, TypeORM, Strapi, Stripe, AWS EC2, AWS SES, AWS S3, AWS Transcribe, OpenAI API, Docker, TailwindCSS, SCSS, MUI, etc.

TECHNICAL SKILLS

- ★ **Back-End:** NodeJS, Express, NestJS, NextJS, Typescript, Strapi (CMS).
- ★ **Database:** MongoDB, MySQL, PostgreSQL, Redis, Firestore, Mongoose, Prisma, and TypeORM.
- ★ **Cloud and DevOps:** AWS (S3, EC2, RDS, DynamoDB, SES, Transcribe, Amplify), Docker, CI CD with GitHub Actions, Nginx, PM2, Linux.
- ★ **Front-End:** React, Redux, NextJS, Bootstrap, Tailwind CSS, Ant Design, and MUI.
- ★ **Tools:** Postman, Figma, Netlify, VS Code, Open AI, Github, Firebase, Gitlab, Slack, etc.

SOFT SKILLS

I prioritize communication, teamwork, creativity, empathy, accountability, patience, confidence, collaboration, and time management.

PROJECTS

AI-Based Realtor

My team built a Real Estate application with AI using OpenAI and Replicate API. I worked with the team as a full-stack developer to develop API and design UI.

- ❖ Developed API using Express, and Typescript, which communicates with MongoDB via Mongoose.
- ❖ Designed and developed UI using NextJS, Formik, TailwindCSS, and other necessary npm libraries.
- ❖ Built multiple AI assistants using OpenAI's latest model and trained them using our dataset.
- ❖ Utilized Replicate API for image processing and mail sending using Mailgun.
- ❖ Implemented role-based auth, subscription plan, Cron job scheduling, and integrated payment with Stripe.

Tools Used: Express, Typescript, OpenAI API, Replicate API, Mailgun, Joi, Cron Job, Stripe, MongoDB and Mongoose.

2Expedition Travel App

I have designed and developed a full-stack web application for 2Expedition, a travel agency in Armenia, working solo from requirement analysis to production deployment.

- ❖ Designed and developed UI using NextJS, Typescript, MUI, TailwindCSS, Google Maps, Sun-Editor, React Slick, and other necessary npm libraries.
- ❖ Implemented localization for multiple languages and currencies.
- ❖ Developed API using NestJS, Typescript, MySQL, TypeORM, AWS, and Nodemailer.
- ❖ Deploy the frontend app using AWS Amplify and the backend app to AWS EC2.
- ❖ API validation using class-validator.

Tools Used: NestJS, Typescript, MySQL, TypeORM, Google Maps API, Gmail Passkey, NextJS, MUI, Tailwind CSS, Sun Editor, React Slick, Nodemailer and AWS services.

CREFIN - under construction

Crefin is an AI-driven financial mobile application bot. We are using Flutter and Express in this project. I am responsible for developing API solutions as a backend developer.

- ❖ Developed API using Express, and Typescript, which communicates with MongoDB via Mongoose.
- ❖ Implemented authentication through OTP by utilizing AWS SES, as well as Google and Facebook auth.
- ❖ Built AI assistants using OpenAI's latest model and trained using our dataset.
- ❖ Converted speech to text using AWS Transcribe service for user voice messages.
- ❖ Calculated and generated a PDF term sheet and mailed it to the user using AWS SES service.
- ❖ API validation using Joi.

Tools Used: Express, Typescript, MongoDB, Mongoose, OpenAI, Joi, Puppeteer, Google and Facebook auth, AWS SES, AWS Transcribe.
